-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 19, 2004 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Admitted Prior Art (AAPA) in view of Oetiker'879 (US Patent 5,321,879) or Oetiker'781 (US Patent 4,425,781).

Applicant, at page 1 of the specification to be known as AAPA, discloses a method of making a clip and irrigation hose assembly wherein a wound hose is delivered to a site where it is unwound and clips are manually attached to the hose typically by a snap fit. AAPA does not disclose the clip being preassembled to the hose before being shipped to a site for subsequent installation of the hose and clip assembly. However it is known

Art Unit: 3726

to preinstall clips on objects to be fastened as attested by Oetiker'879, see column 1, lines 31-34, column 2, lines 19-38 and the abstract, or Oetiker'781, column 4, lines 38-47. Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made, to have preassembled the clips of AAPA on the hose before shipping the hose to a different site, in light of the teachings of Oetiker'879 or Oetiker'879, in order to save time on assembly. Applicant should note that clips with inner diameters sized and configured to be secured around the hose and be also moveable on the hose are old and well known in the art. It should also be noted that the process of Oetiker is an automatic process.

Response to Arguments

4. Applicant's arguments with respect to claims 7 and 8 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
